

Put your brewery in the black

We've been saying heavy metal isn't always cool when it comes to kegs. That's why we introduced the plastic sixth-barrel PubKeg as a practical one-way packaging option. Now, we're pleased to

introduce the PubKeg Black Exchange Program, a pooled solution for brewers and distributors looking for more. Pledge to buy 6,000 black PubKegs and you are eligible to join the program.

Rehrig Pacific will refund \$3.50 for every black PubKeg you return to any of our 14 recycling depots across the country. PubKeg Black is truly a "Green" solution – more sustainable and more profitable. With PubKeg Black you keep all of the added value and protect your brew. Successfully taste-tested by qualified panels, you can quickly enter new or seasonal markets because PubKegs are always available and ready-to-ship. Likewise, PubKegs arrive sanitized, require no washing, and are compatible with existing fill equipment.

For full details, contact Rehrig about joining the PubKeg Black Exchange Program today!
